

Austrotherm Fassadenprofile

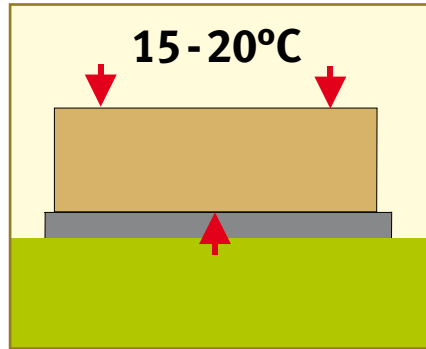

► **Sonderpreisliste**

Verarbeitungshinweise:

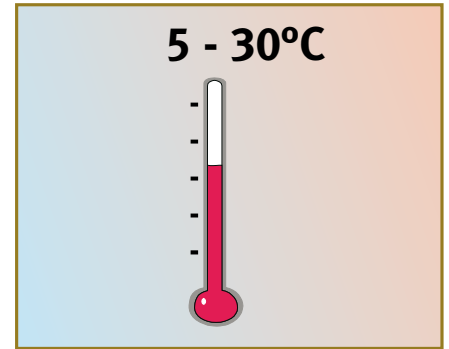

Lagerung:

- ▶ AUSTROTHERM Fassadenprofile werden im Karton verpackt ausgeliefert.
- ▶ Unbedingt auf stabilem, ebenem Untergrund lagern.
- ▶ Vor Feuchte, Nässe und großer Hitze schützen!

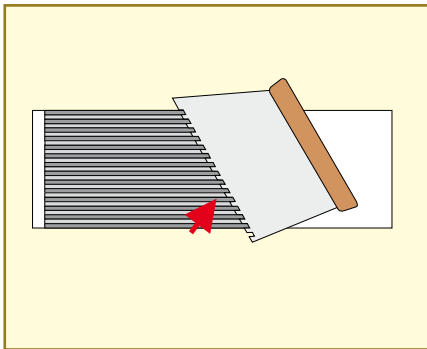

Verformung:

- ▶ Bei Verformung durch unsachgemäßen Transport oder Lagerung wie folgt vorgehen: Die verformten Profile kurz auf einem planen Untergrund bei einer Temperatur von zumindest 15°C (ev. mit einer Auflast) lagern.

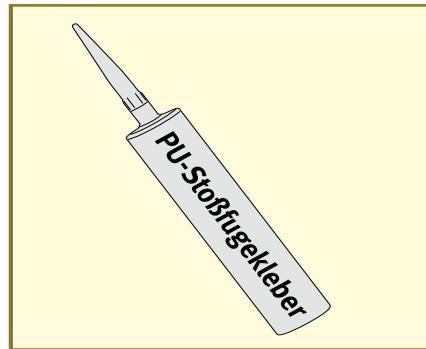

Verarbeitungstemperatur:

- ▶ Um eine dauerhafte Verklebung zu gewährleisten, ist auf die richtige Temperatur zu achten:
- ▶ Die Verarbeitungs- und Untergrundtemperatur darf nicht unter +5°C und über +30°C liegen.

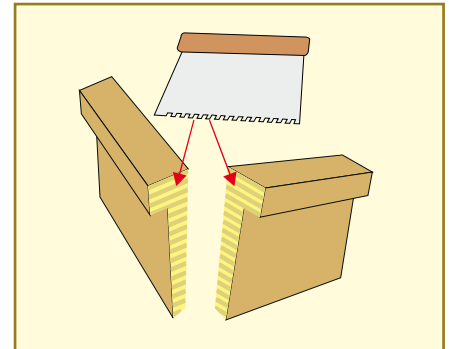

Befestigung:

- ▶ Aufkleben der Profile nur auf stabile, staub- und fettfreie Untergründe. Üblichen Fassadenkleber auf dem Untergrund der zu klebenden Flächen vollflächig mit einer Zahnpachtel auftragen. Die Verarbeitungsrichtlinien des Klebers beachten.

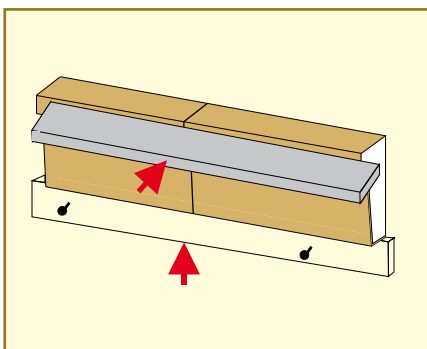

AUSTROTHERM PU-Stoßfugenkleber:

- ▶ Die Haftflächen müssen sauber sein. Glatte Haftflächen sind aufzurauben. Nach dem vollflächigen Auftragen des Austrotherm Stoßfugenklebers sollen die Materialien innerhalb von 5 Minuten zusammengesetzt werden. Die Klebeflächen sind gegen Verrutschen zu fixieren.

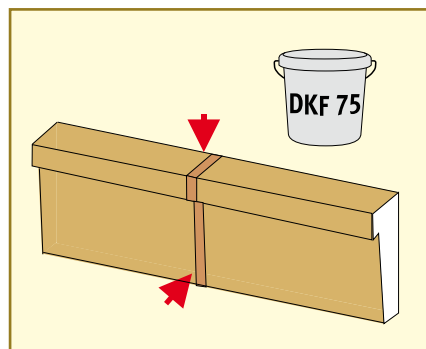

Profilstoß:

- ▶ Wichtig: Es ist besonders darauf zu achten, dass **beide Profilquerschnitte (Stirnseiten) vollflächig mit AUSTROTHERM PU-Stoßfugenkleber** versehen werden.

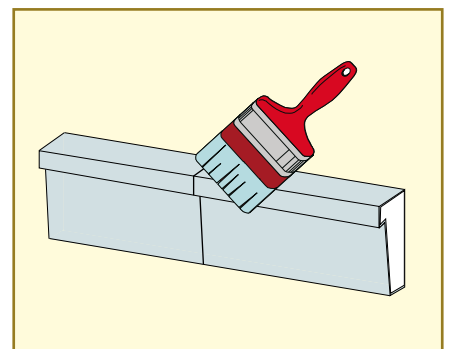

Profilausrichtung:

- ▶ Um eine exakte Ausrichtung der Profile zu erhalten, sollte mit einer Richtlatte gearbeitet werden. Bei größeren Profilen sollte zusätzlich eine gerade Latte an der Wand befestigt werden. Profile satt und fest andrücken.

Nachbearbeitung:

- ▶ Denevtl. überquellenden Austrotherm PU-Stoßfugenkleber mit einer Spachtel entfernen. Nach Aushärtung des PU-Stoßfugenklebers ist die Oberfläche mit der hochflexiblen **Austrotherm Beschichtungsmasse DKF 75** zu verschließen. Dann kann die Oberfläche mit Schleifpapier nachbearbeitet werden.

Farben:

- ▶ Nachdem alle Stöße nachbearbeitet wurden, kann Farbe aufgetragen werden. Die Fassadenfarbe auf Silikat-, Kunstharz-, bzw. Silikonbasis wird im Streich-, Roll- oder Spritzverfahren dünn-schichtig auf den staubfreien und trockenen Profilen aufgebracht.

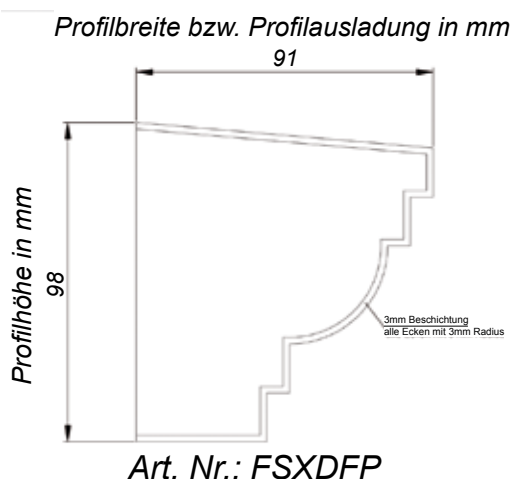

Preisliste Austrotherm Fassadenprofile Sondersortiment

Inhalt

- ▶ Erläuterungen und allgemeine Informationen
- ▶ Preisblätter Austrotherm Fassadenprofile Sondersortiment
- ▶ Austrotherm Brettprofil
- ▶ Austrotherm Gesimse
- ▶ Austrotherm Nutprofil
- ▶ Austrotherm Sohlbank und Gurtprofil

Wie berechnet sich der Preis eines Austrotherm Sonderprofils?

Neben dem lagernden Standardsortiment hat Austrotherm ca. 3700 Fassadenprofile im Sondersortiment entwickelt. Diese werden auf Kundenwunsch in der gewünschten Laufmeteranzahl produziert. Der Listenpreis variiert je nach Laufmeter-Anzahl sowie nach der Profilbreite bzw. -höhe.

Profilbreite 91 x 98 mm Bedarf ca. 55 Laufmeter

Berechnungsbeispiel wie untenstehend oval markiert - **Liste € 25,97 / lfm. exkl. USt.**
